RE: School Community Member Tested Positive for COVID-19

Dear School Community,

We are connecting with you to let you know that upon further investigation by Interior Health it was determined that there has NOT been a COVID exposure in the school setting at Eagle River Secondary on January 4th and January 5th, 2021.

We are aware of your concerns in our community regarding the presence of COVID-19. We also want to let you know that Interior Health will post school exposure notifications on their website, providing the date and type of notification, for impacted schools. Be assured that if a member of a school community were to test positive for COVID-19, the local health authority would follow up directly with an individual who may have been exposed.

As recommended by the local Health Authority, if you or your child develops any symptoms of COVID-19, please self-isolate and book an appointment to assess for COVID-19.

The well-being of our staff and students remains our number one priority and we will continue to follow all of the necessary protocols to help maintain the health and safety of our community. We want to thank you for following all of these important protocols, to the best of your ability, and express our continued hope that all of our community members stay healthy through these challenging times.

If you have questions or concerns about COVID-19, please call 811.

Sincerely,

Mark Marino
Principal – Eagle River Secondary
